

About this organisation

Machine translation

This profile has been machine-translated based on data provided in German.

Stäubli offers innovative mechatronics solutions in three areas of activity: Coupling systems, industrial robots and textile machines. Present on all continents, Stäubli has 12 industrial production plants. Agencies in 50 countries complement the sales and service subsidiaries that Stäubli maintains in 28 countries. Around 500 employees work in development, production, sales, customer support and training at the Bayreuth site.

Coupling systems With innovative coupling solutions for vacuum applications, Stäubli supports manufacturers in mould making as well as in parts handling during processing. Stäubli quick couplings withstand both the vacuum process in autoclaves and the prevailing temperatures of up to 250°C. **Industrial robots** Turnkey solutions for the machining of polymer composites that guarantee maximum productivity and at the same time precision and reproducibility. **Textile machines** High-speed shedding and Jacquard machines for technical fabrics (including 3D fabrics) that fulfil individual customer requirements and needs. Complete weaving systems that are optimally adapted to the fibre-friendly production of multi-layer and spacer fabrics made from sensitive yarns such as aramid and carbon.

Overview of lightweighting expertise

Machine translation

This profile has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Offer			
Products Parts and components, Machines and plants, Systems and end products, Tools and moulds		✓	✓
Services & consulting Training, Consulting, Engineering, Prototyping, Simulation, Maintenance and repair		✓	✓
Field of technology			
<i>Design & layout</i>			
<i>Functional integration</i>			
<i>Measuring and testing technology</i>			
<i>Modelling and simulation</i>			
Plant construction & factory automation Plant construction, Robotics		✓	✓
<i>Recycling technologies</i>			

Overview of lightweighting expertise

Machine translation

This profile has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Manufacturing process			
<i>Additive manufacturing</i>			
<i>Coating (surface engineering)</i>			
<i>Fibre composite technology</i>			
<i>Forming</i>			
<i>Joining</i>			
<i>Material property alteration</i>			
Primary forming			
Injection moulding			✓
Processing and separating			
Milling			✓
Textile technology			
Weaving		✓	✓

Overview of lightweighting expertise

Machine translation

This profile has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Material			
<i>Biogenic materials</i>			
<i>Cellular materials (foam materials)</i>			
Composites Aramid fibre composites, Glass-fiber reinforced plastics (GFRP), Metal-fibre-polymer composite, Natural fibre reinforced plastics (NFRP), Laminates, Textile-reinforced concrete, Others:			✓
<i>Fibres</i>			
<i>Functional materials</i>			
<i>Metals</i>			
<i>Plastics</i>			
<i>Structural ceramics</i>			
(Technical) textiles Woven fabrics		✓	✓
