Department of Lightweight Technologies

About this organisation

Machine translation

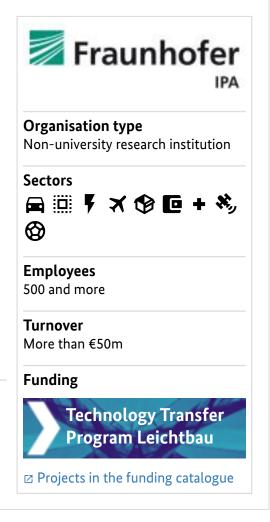

This profile has been machine-translated based on data provided in German.

Fraunhofer IPA is one of the largest institutes of the Fraunhofer-Gesellschaft and was founded in 1959. The 14 specialised departments of Fraunhofer IPA are complemented by the six business units Automotive, Mechanical and Plant Engineering, Electronics and Microsystems Technology, Energy, Medical and Biotechnology and Process Industry.

Fraunhofer IPA conducts research into the production engineering and automation of lightweight construction technologies. The focus is on machining processes for CFRP and other lightweight materials and their peripheral processes, such as extraction and cooling lubrication technologies and automated quality control. Fibre composite-compatible designs are implemented for constructive lightweight construction, as well as functional joining, topology and structure optimisation and generative manufacturing processes. Furthermore, functional particles such as carbon nanotubes and graphene are produced and transferred to industrial applications.

Nobelstraße 12 70569 Stuttgart Baden-Württemberg Germany

Department of Lightweight Technologies

About this org	ganisation
Main areas covered	Lightweight construction, Machining technologies, Automation technology, Connection technology, Health protection and quality
Infrastructure	Finishing / Machining, Machining quality assurance, Simulation software hybric lightweight construction, Lightweight construction methodology, Factory and production planning
Certifications	
Keywords	
Memberships	

Overview of lightweighting expertise Machine translation This profile has been machine-translated based on data provided in German. Manufacturing Research Development & Supply Offer Products Parts and components, Machines and plants, Materials Services & consulting Training, Consulting, Testing and trials, Engineering, Validation, Technology transfer

Department of Lightweight Technologies

Overview of lightweighting expertise			
Machine translation			
This profile has been machine-translated based on d	ata provided in	German.	
	Research	Development	Manufacturing & Supply
Field of technology			
Design & layout Lightweight manufacturing, Hybrid structures, Lightweight construction concepts, Lightweight material construction	✓		
Functional integration Actuator technology, Sensor technology	✓		
Measuring and testing technology Component and part analysis, Visual analysis (e.g. microscopy, metallography), System analysis, Environmental simulation, Materials analysis, Destructive analysis, Non-destructive analysis	✓		
Modelling and simulation Loads & stress, Multiphysics simulation, Optimisation, Processes, Structural mechanics, Materials	✓		
Plant construction & factory automation Plant construction, Automation technology, Handling technology, Robotics	✓		
Recycling technologies Material separation	✓

Department of Lightweight Technologies

Overview of lightweighting expertise			
Machine translation This profile has been machine-translated based on c	lata provided in	German.	
	Research	I Development	Manufacturin & Supply
Manufacturing process			
Additive manufacturing 3D printing, Selective laser melting (SLM, LPBF,), Selective laser sintering (SLS), Stereolithography	✓		
Coating (surface engineering) Galvanising, Painting, Plasma process, Powder coating	✓		
Fibre composite technology			
Forming			
Joining Adhesive bonding, Soldering, Riveting	✓		
Material property alteration Mechanical treatment, Heat treatment	✓		
Primary forming			
Processing and separating Drilling, Turning, Milling, Sawing, Shearing/ punching, Grinding, Cutting	✓		
Textile technology

Department of Lightweight Technologies

Machine translation			
This profile has been machine-translated based on da	ata provided in	German.	
	Research	l Development	Manufacturing & Supply
Material			
Biogenic materials Wood	✓		
Cellular materials (foam materials)			
Composites Aramid fibre composites, Basalt fibre-reinforced plastic, Glass-fiber reinforced plastics (GFRP), Carbon-fiber reinforced plastics (CFRP), Metal-fibre-polymer composite, Metal matrix composite, Nanocomposites, Natural fibre reinforced plastics (NFRP), Laminates, Particulate composites	~		
Fibres			
Functional materials			
Metals Aluminium, Intermetallic alloys, Magnesium, Steel, Titanium	✓		
Plastics Thermoset plastics, Elastomers, Thermoplastics	✓		
Structural ceramics
