FEINGUSS BLANK GmbH is one of the leading investment casting foundries in Europe. No other metal-forming process can produce similarly complex moulds under comparable economic conditions as investment casting using the lost wax process. Quality at the highest level, precision down to the smallest detail and an almost inexhaustible variety of materials characterise investment casting, made by FEINGUSS BLANK.

As a development partner, we don't just limit ourselves to the casting-compatible design of your component, but also provide new approaches to part optimisation with a variety of simulation options. With the help of the digital prototype, we have the opportunity to improve the investment casting in terms of topology and strength even before actual production, thereby achieving material and cost savings. Another added value for the customer is the time savings resulting from the simulation findings, which replace timeconsuming, real-life tests.

Industriestraße 18 88499 Riedlingen Baden-Württemberg Germany ☑ www.feinguss-blank.de

About this organisation

Main areas covered	Investment castings
Infrastructure	
Certifications	ISO 9001:2008, ISO/TS 16949:2009, ISO 14001:2004 + Cor 1:2009, ISO 50001:2011
Keywords	Investment casting, Topology optimisation, FEM simulation, Additive manufacturing
