

About this organisation

Machine translation

This profile has been machine-translated based on data provided in German.

With a turnover of over € 320 million (2015), the family-owned company SAERTEX® is the global market leader in the production of multiaxial fabrics and core materials for the manufacture of fibre composites. Customers in the wind, aviation, automotive and sports industries as well as in boat building rely on composites that are made lighter, stronger and more corrosion-resistant thanks to SAERTEX reinforcement materials made from glass, carbon and aramid fibres.

In 2002, SAERTEX entered the field of component production with its plant in the "CFRP Valley" of Stade. Here, our engineers develop customised composite solutions for our customers. We provide advice and support from the initial idea to the finished component. We offer production capacity for RTM, vacuum infusion and prepreg processes on 8500m² of fully air-conditioned production space.
