Innovative manufacturer of speciality chemicals: raw materials and downstream products

Evonik Industries is one of the leading speciality chemicals companies and produces a large number of different materials that are used in a wide variety of lightweight construction technologies. From the replacement of glass with PLEXIGLAS® to the replacement of metal with thermoplastic specialty polymers to adhesive raw materials for aluminium bonding and, of course, the large field of fibre composites. Evonik manufactures products that are used in almost all production steps and components of a fibre composite component, whether in aviation, automotive or wind energy applications. We supply core materials for sandwich construction, thermoplastic and thermoset resin matrices as well as products for the matrix such as hardeners and crosslinkers, catalysts, impact modifiers and process additives. In addition, products for fibre sizing and sizing, for fibre processing and the production of textile fabrics.

Rellinghauser Str. 1-11 45128 Essen North Rhine-Westphalia Germany

About this organisation				
Main areas covered	Fibre composites, Core materials, Perspex, Thermoplastics			
Infrastructure	Laboratories and application technology			
Certifications	ISO 9001 + various others			
Keywords	Raw materials and semi-finished products			
Memberships				

Overview of lightweighting expertise

Machine translation

This profile has been machine-translated based on data provided in German.

	Research	N Development	Manufacturing & Supply
Offer			
Products Semi-finished parts, Materials, Others: null	~	✓	✓
Services & consulting			
Field of technology			
Design & layout			
Functional integration			
Measuring and testing technology			
Modelling and simulation			
Plant construction & factory automation			
Recycling technologies
