

# Siltex Flecht- und Isoliertechnologie Holzmüller GmbH & Co KG

## About this organisation

### Machine translation

This profile has been machine-translated based on data provided in German.

SILTEX is an expanding, globally active company in Lower Bavaria, directly on the Austrian border. For over half a century, we have been specialising in braided and insulating sleeves for thermal and electrical insulation as well as for the areas of plastic reinforcement and lightweight construction.

Decisive advantages over woven fabrics or the wrapping technique: 1.homogeneous fibre symmetry throughout the entire component 2.no major changes in direction 3.endlessly processed fibres continuously over the component length 4.symmetrical fibre layer 5.natural cohesion of the fibres, resulting in good handling 6.the braid moulds itself to the contour or the workpiece 7.no folds or overlaps, thus enabling more efficient lightweight construction 8.material, cost and time savings 9.integration of fibres in 0° direction possible (SILTRIAX) - increasing the mechanical strength of linear components

Palmstraße 27

### Organisation type

Small or medium-sized enterprise

### Sectors

### Employees

10 up to 49

### Turnover

n/a

### Funding

n/a

### Main areas covered

Hybrid lightweight construction

### Infrastructure

**Certifications** ISO 9001 / 2015

**Keywords** Lichens, Braided structures, Electrical insulation, Customised products, Hybrid

### Memberships

# Siltex Flecht- und Isoliertechnologie Holzmüller GmbH & Co KG

## Overview of lightweighting expertise
