wbk Institute for Production Technology

## About this organisation

#### **Machine translation**

This organisation has been machine-translated based on data provided in German.

With around 100 employees, the institute is divided into three research areas: -Manufacturing and materials technology -machines, systems and process automation -Production systems in which the knowledge and experience of selected areas of production technology is anchored. Current research focusses on -Microproduction -Lightweight construction -electromobility -Generative manufacturing -Industry 4.0

The objectives of the "Lightweight Construction" research focus include the development of production technologies for newly developed materials, processes and construction methods with high lightweight construction potential in line with requirements. The aim is to make the leap from a new technology developed in the laboratory to the automated and economical manufacture of lightweight products in series production. In addition, established manufacturing processes are being made more flexible and automated so that they can be used economically in series production. The area of lightweight production at wbk covers the areas of metals, fibre-reinforced plastics and hybrid structures. Process development and automation, joining technology, quality assurance and post-processing are addressed in all areas. Further cross-divisional connections can be made through the activities of the wbk in the KIT Lightweight Construction Network.

Kaiserstraße 12 76131 Karlsruhe Baden-Württemberg Germany ☑ www.wbk.kit.edu

## Organisation type

University or higher education institution

#### Sectors

## **Employees**

50 up to 249

## Turnover

n/a

## **Funding**

wbk Institute for Production Technology

Main areas covered	Handling and process chaining, Shaping, Hybridisation, Quality assurance, Post-processing
Infrastructure	Production technology laboratory, various handling equipment, Measuring room (including computer tomography), RTM process chain, Organosheet process chain
Certifications	
Keywords	Automation solutions, Process development, Materials research

## Overview of lightweighting expertise

## **Machine translation**

This organisation has been machine-translated based on data provided in German.

	Research	N Development	Manufacturing & Supply
Offer			
Products Parts and components, Semi-finished parts, Machines and plants, Software & databases, Materials, Tools and moulds	<b>✓</b>	<b>✓</b>	
Services & consulting Training, Consulting, Testing and trials, Engineering, Standardisation, HR services, Prototyping, Validation, Simulation, Technology transfer	<b>✓</b>	<b>✓</b>
