# About this organisation

### **Machine translation**

This organisation has been machine-translated based on data provided in German.

AME GmbH sees itself as a service provider for structural optimisation, FEM simulation and design tasks. The focus is on mechanically justifiable lightweight structures, combined with many years of experience in the field of additive manufacturing processes. We pass on our knowledge to interested customers in training concepts tailored to their individual needs.

Our systematic, mechanically based approach enables us to meet the increasing demands placed on components and structures in industrial applications. We use our knowledge in the field of technical mechanics and lightweight construction, applying numerical methods for efficient structural optimisation. Where necessary, we use additive manufacturing processes in a targeted manner to produce potentially complex and mechanically optimised structures. We want to make a contribution to sustainability by driving forward resource-efficient developments. At the same time, the aim is to maintain or even improve the performance of the components.

Carlo-Schmid-Allee 3 44263 Dortmund North Rhine-Westphalia Germany

About this organisation			
Main areas covered	Structural optimisation, Additive manufacturing		
Infrastructure			
Certifications			
Keywords	FEM simulation, Customised training offer		
Memberships			

Overview of lightweighting expertise			
Machine translation			
This organisation has been machine-translated base	d on data provic	led in German.	
			Manufacturing
	Research	Development	& Supply
Offer			
Products			
Parts and components	<b>✓</b>		
Services & consulting			
Services & consulting Training, Consulting, Engineering, Prototyping, Simulation, Technology transfer		<b>✓</b>
