Specialised waste management company

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

As a subsidiary of Karl Meyer AG, CFK Valley Stade Recycling GmbH & Co KG is responsible for the waste disposal and recycling of carbon fibre reinforced plastics (CFRP) and carbon fibres (C-fibres). A CFRP recycling plant, unique in Germany, recovers pure carbon fibres from production waste and end-of-life components by means of thermal treatment.

The CFRP recycling plant was commissioned in 2011, operates with a minimum capacity of approx. 1000 tonnes p.a. and won the first "German Raw Material Efficiency Award" in the same year. In a first step, CFRP waste delivered to the plant is sorted according to fibre type and processing condition and, if necessary, shredded. Pure carbon fibres are recovered with the help of the pyrolysis plant. The product properties of the recycled fibres are almost comparable to those of new fibres. In the next step, the fibres are further processed according to customer specifications and, depending on the application, can be processed into free-flowing short fibres, long fibres or a fibre fleece.

Specialised waste management company

Main areas covered	services, Lightweight construction products
Infrastructure	Plant: Preparation of CFRP fibres, Plant: Cutting of CFRP fibres
Certifications	ISO 14001, ISO 9001, Specialised waste management company (Efb)
Keywords	CFK Valley Stade, Carbon Composites e.V., CFRP recycling, Pyrolysis, CFRP disposal
Memberships	

Overview of lightweighting expertise **Machine translation** This organisation has been machine-translated based on data provided in German. Manufacturing Research **Development** & Supply Offer **Products** Services & consulting Field of technology Design & layout Functional integration Measuring and testing technology Modelling and simulation Plant construction & automation **Recycling technologies** Recycling
