

Teijin Carbon Europe GmbH

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

Teijin has been manufacturing Tenax® carbon fibres in Germany for around 35 years. To this day, Teijin is the only manufacturer of carbon fibres in Germany. With around 450 employees, the company is represented at two locations in North Rhine-Westphalia: Sales, development and laboratories are located in Wuppertal. The entire production and administration is located in Heinsberg-Oberbruch.

Tenax® carbon fibre is an absolutely high-tech material and is available as filament yarn and short fibres. It impresses with its strength and durability. Semi-finished products from Teijin facilitate and accelerate the production of carbon components while minimising material requirements: Tenax® ThermoPlastics are innovative materials that speed up manufacturing processes and ensure low waste quantities, excellent mechanical properties, chemical resistance and recyclability. Tenax® Dry Reinforcements can be supplied as raw fabric or with optimised drapability and increased impact resistance. Tenax® Part via Preform is an innovative manufacturing process in which components are produced directly as a preform in the final contour and by means of HP-RTM injection. Tenax® prepregs are available in a variety of moulds.

Teijin Carbon Europe GmbH

About this organisation

Main areas covered	Carbon fibres, carbon
Infrastructure	Production, sales, development
Certifications	EN 9001 + 9100, ISO 14001 + 50001
Keywords	Carbon fibre, carbon, carbon fibre
Memberships
