About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

Roth Composite Machinery manufactures machines and entire production lines for processing glass, basalt and carbon fibres. Roth Composite Machinery is a full-service provider for component development, project planning of production systems, manufacture of special machines and process engineering support for production. 120 employees at three locations

Roth Composite Machinery is a specialist in special machine construction - the company plans, designs and manufactures units, machines and entire production lines in the business areas of Filament Winding & Prepeg, Pleating & Coating, Brushes & Brooms. Filament Winding & Prepreg Roth Composite Machinery (formerly EHA) supplies individual solutions for the processing and production of fibrereinforced plastics worldwide. With over 50 years of experience and more than 500 machines in use worldwide, Roth Composite Machinery is the global technology leader. - Precision through customised design of mechanics and dynamics - Flexibility in the processing of all commercially available fibres - Versatility in the use of wet winding, towpreg, tape and thermoplastic mixed fibres (comingeld) -From individual machines to complete factory equipment

Organisation type

Small or medium-sized enterprise

Sectors

Employees

50 up to 249

Turnover

€10m - €50m

Funding

n/a

Bauhofstraße 2 35239 Steffenberg Hesse Germany

About this organisation			
Main areas Mechanical engineering FW & Prepreg covered			
Infrastructure			
Certifications	DIN EN ISO 9001:2015		
Keywords	Filament Winding, Special machines, Prepreg, Complete production system		
Memberships			

Overview of lightweighting expertise **Machine translation** This organisation has been machine-translated based on data provided in German. Manufacturing Development Research & Supply Offer **Products** Machines and plants **Services & consulting** Training, Consulting, Testing and trials, Engineering, Maintenance and repair Field of technology Design & layout Functional integration Measuring and testing technology Modelling and simulation Plant construction & automation Plant construction, Automation technology Recycling technologies
