## About this organisation

### Machine translation

This profile has been machine-translated based on data provided in German.

In the economic region of Augsburg, a unique project of the century is being realised on an area of around 70 hectares: the Augsburg Innovation Park. Under the guiding principle of "Technologies for Resource Efficiency", new products are to be researched and developed in an open and creative collaboration between business and science, as well as providing important impetus for the sustainable and civil development of society.

The Augsburg Innovation Park is therefore focussing on the topic of "production-oriented development of technologies for resource efficiency" with a view to the entire value chain of the four technology areas mentioned.
