

TAF Thermische Apparate Freiberg GmbH

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

TAF Thermische Apparate Freiberg GmbH has extensive experience in the design and construction of process equipment for gasification technologies and is a developer and supplier of customised solutions in mechanical and plant engineering, especially under higher process pressures.

The company specialises in the development and supply of pilot and test plants and offers complete process engineering systems for this purpose. The development and manufacture of customised solutions includes thermal apparatus, pressure vessels, reactors, burner technology and heat exchangers, including the supply of the necessary steel construction and completion with conveyor technology and peripheral equipment. As a certified specialist welding company for the manufacture and repair of steam boilers, pressure vessels and pipelines, the company has all the necessary authorisations and quality testing procedures.

Halsbrücker Str. 34
