

Industrieverband Klebstoffe e.V.

Representing the interests of the German adhesives industry

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

The Industrieverband Klebstoffe e. V., based in Düsseldorf, represents the technical and economic interests of the German adhesives industry. The adhesives industry attaches great importance to technical issues as well as environmental, consumer and occupational safety. The association documents this to the public, authorities, consumers and scientific institutions.

In order to realise lightweight constructions, companies rely on the key technology of bonding. Only bonding enables a secure and durable connection of fibre composites and multi-material constructions, which are required for lightweight construction methods. Composite materials must be bonded because only bonding technology does not impair the material properties that are important for lightweight constructions. Innovative lightweight constructions have therefore only become possible thanks to adhesives. The professional use of adhesives requires experience and expertise. Manufacturers of lightweight constructions must adhere to guidelines. This is where the standard DIN 2304 "Adhesive bonding technology - Quality requirements for bonding processes" launched by the IVK comes in. It describes the state of the art for the organisation of the professional implementation of bonding processes in user companies. The IVK is a member of the Interessengemeinschaft Leichtbau e.V. (igeL e.V.)

Organisation type

Association, Chamber of industry and commerce

Sectors

Employees

Up to 9

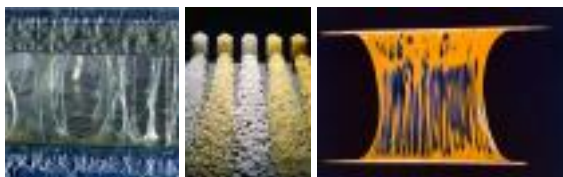

Turnover

Industrieverband Klebstoffe e.V.

Representing the interests of the German adhesives industry

About this organisation

Main areas covered Technical commissions, Working groups, Seminars/Conferences, Networking, market data, statistics, Consulting, standardisation

Infrastructure on request

Certifications DIN EN 2304

Keywords Bonding technology, Adhesive, Gluing, Adhesive bond

Memberships

Overview of lightweighting expertise
