

Gubesch Thermoforming GmbH

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

As a full-service provider in plastics processing, we produce sophisticated plastic components based on modern injection moulding and thermoforming technologies for our customers worldwide. We support them from the initial product idea through to series production and combine our expertise in the areas of research & development, prototyping, toolmaking, plastics processing and surface finishing.

The Gubesch Group is a full-service provider and component developer based on innovative thermoforming and injection moulding technologies. Their integration into OneShot processes makes it possible to realise efficient lightweight construction solutions for large-scale production applications. Short decision-making processes and the many years of expertise of our employees guarantee interdisciplinary work and high efficiency. The resulting synergy effects enable us to reduce costs and cover a wide range of manufacturing processes: - Highly weight-reduced components based on thermoformed Advanced composites for series applications - Full service package: comprehensive development and engineering services services including process and component simulation - Rapid prototyping: SLS, STL, FDM, 3D printing - Film decoration: insert moulding, IMD, IMD-Pro, Multi-K, MultiDecoMolding, IPD Skin-Process - Surface finishing: lacquering, PVD, hot stamping, pad printing

Industriestraße 1
91489 Wilhelmsdorf

GUBESCH GROUP

Organisation type

Large enterprises

Sectors

Employees

500 and more

Turnover

More than €50m

Funding

n/a

Gubesch Thermoforming GmbH

About this organisation

Main areas covered Structural applications, Semi-structural applications, Underbody panelling, Crash management

Infrastructure

Certifications ISO 9001:2015, IATF 16949:2016, ISO 14001:2005, ISO 50001:2011

Keywords SpriForm, Twin-O-Sheet, Organosheet - Processing, Composite processing, Nuremberg, FRP, GFRP, CFRP - Processing

Memberships Cluster New Materials-Bavaria Inno

Overview of lightweighting expertise

	Research	Development	Manufacturing & Supply
Manufacturing process			
Additive manufacturing 3D printing, Selective laser sintering (SLS), Stereolithography			✓
Coating (surface engineering) Galvanising, Painting			✓
Fibre composite technology Pre-preg processing	✓	✓	✓
Forming Bending, Impact extrusion, Compression moulding, Thermal converting, Deep-drawing			✓
Joining Hybrid joining, Adhesive bonding, Riveting, Screwing, Welding		✓	✓
<i>Material property alteration</i>			
Primary forming Injection moulding		✓	✓
Processing and separating Drilling, Turning, Milling, Electrical discharge machining, Sawing, Shearing/punching, Grinding, Cutting			✓
<i>Textile technology</i>
