

Heermann Maschinenbau GmbH

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

HEMA develops band saws for almost all materials and applications

Honeycomb blocks, foams or composite materials - the sometimes highly specific materials of the lightweight construction industry are our daily challenge. We support our customers from material development and certification through to series production of the products. In addition to the technical solutions of HEMA cutting systems, we consider the economic efficiency of the future production line in the development phase of new products, taking ecological aspects into account with the aim of optimising productivity

Steinbeisstraße 8
72636 Frickenhausen
Baden-Württemberg

Research Development **Manufacturing & Supply**

Offer

Products

Machines and plants, Software & databases, Systems and end products, Materials, Tools and moulds

Services & consulting

Field of technology

Design & layout

Functional integration

Measuring and testing technology

Modelling and simulation

Plant construction & automation

Recycling technologies

Manufacturing process

Additive manufacturing

Coating (surface engineering)

Fibre composite technology

Forming

Joining

Material property alteration

Primary forming

Processing and separating

Textile technology
