Tascon GmbH is a leading international laboratory in the field of surface analysis. It has a globally unique combination of many years of experience, application expertise and state-of-the-art analytical equipment. In addition to its activities as an analysis laboratory, Tascon GmbH advises its customers on all topics relating to surfaces. As a flexibly accredited testing laboratory (DIN ISO/IEC 17025), it is also a competent partner for R&D.

As a surface analysis service provider, Tascon GmbH has extensive experience in the field of lightweight construction. Analysis and consulting are not limited to individual materials, so that metals, plastics or even composite materials can be analysed. Customers and co-operation partners in the field of lightweight construction come from all sectors, such as the polymer industry, the automotive industry or the metalworking industry. Tascon's typical fields of activity are quality and process control, failure and damage analysis, development support and reverse engineering.
