

Roth Composite Machinery GmbH

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

Roth Composite Machinery manufactures machines and entire production lines for processing glass, basalt and carbon fibres. Roth Composite Machinery is a full-service provider for component development, project planning of production systems, manufacture of special machines and process engineering support for production. 120 employees at three locations

Roth Composite Machinery is a specialist in special machine construction - the company plans, designs and manufactures units, machines and entire production lines in the business areas of Filament Winding & Prepeg, Pleating & Coating, Brushes & Brooms. Filament Winding & Prepreg Roth Composite Machinery (formerly EHA) supplies individual solutions for the processing and production of fibre-reinforced plastics worldwide. With over 50 years of experience and more than 500 machines in use worldwide, Roth Composite Machinery is the global technology leader.

- Precision through customised design of mechanics and dynamics
- Flexibility in the processing of all commercially available fibres
- Versatility in the use of wet winding, towpreg, tape and thermoplastic mixed fibres (comingeld)
- From individual machines to complete factory equipment

Bauhofstraße 2
35239 Steffenberg
