

Hörmann Vehicle Engineering GmbH

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

At HÖRMANN Vehicle Engineering, we accompany our customers through the entire development process chain for rail, road and special vehicles. As a globally active engineering partner, we offer reliable complete vehicle expertise from the initial idea to the finished prototype and series production run. The HÖRMANN Group has more than 200 qualified employees working in vehicle engineering - most of them engineers.

To increase the comfort and efficiency of modern vehicles, the number and weight of additional components (e.g. supercap, traction components) is increasing. In order to compensate for this, we provide load-optimised designs, e.g. of car bodies, by significantly reducing the mass of the structure, wall thickness and dimensions, use new materials in our developments and rely on innovative production technologies. Simulation-based optimisation ensures function and product quality while simultaneously reducing costs and materials. For example, topology and sheet thicknesses can be optimised in critical corners of windows and doors. By using hybrid construction methods of metal-fibre composite patches, we generate extremely lightweight and highly durable structures.

Aue 23 - 27
09112 Chemnitz
Saxony
Germany

Organisation type

Small or medium-sized enterprise

Sectors

Employees

50 up to 249

Turnover

€10m - €50m

Funding

Hörmann Vehicle Engineering GmbH

About this organisation

Main areas covered	Structurally optimised lightweight construction, New materials, Simulation-based optimisation
Infrastructure	IVENTOR, CATIA and more., AUCOTEC, ePLAN and more., Selectron, UniControls and more., MSCNastran, Altair and more.
Certifications	DIN ISO 9001, DIN 3834-2, DIN 6701, and more.
Keywords	Rail vehicle, Tramway, Bogie
Memberships	thermoPre e.V., VDB e.V., BTS Rail Saxony, HZwo e.V.

Overview of lightweighting expertise
