

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

Development, production and distribution of fibre-reinforced plastic profiles and components. The pultrusion process is primarily used for this, although manual lamination or small moulded parts are also possible.

- Design, development and construction of fibre-reinforced components and assemblies - Planning, conceptualisation and implementation of material qualification scopes - Design and construction of pultrusion and assembly tools
- Production of classic fibre-reinforced profiles made of polyester, polyurethane or epoxy resin in combination with glass, flax or carbon fibres. - Production of non-combustible profiles made of FiResist (classification A1 according to DIN EN 13501) - Carrying out assembly and reworking of the manufactured components

About this organisation

Main areas covered	Pultrusion
Infrastructure	Universal testing machine, Mini Pultrusion for test scopes
Certifications	None
Keywords	Non-combustible fibre composite, Pultrusion, Fire protection A1, Natural fibre, Biobased GRP
Memberships	Composite United e.V.

Overview of lightweighting expertise

Machine translation

This organisation has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Offer			
Products Parts and components, Semi-finished parts, Tools and moulds	✓	✓	✓
Services & consulting Consulting, Testing and trials, Engineering, Validation, Technology transfer, Approval	✓	✓	✓

Overview of lightweighting expertise
