About this organisation

Smoke inside the production plant? Dusty, oily machines? The situation need not remain that way. Manufacturers who operate our extraction systems benefit from clean air inside the workplace. They invest in the occupational health of their employees, the longevity of their buildings and plants, as well as in the quality of their products. This investment proves worthwhile. As a leading manufacturer, we set the standard for clean air worldwide.

We offer the right extraction solution for almost every machining process, including the machining of materials made of carbon fibre reinforced plastic (CFRP).

Neue Weilheimer Str. 30 72330 Kirchheim unter Teck Baden-Württemberg Germany

Overview of lightweighting expertise						
	Research	Development	Manufacturing & Supply			
Offer						
Products Machines and plants			✓			
Services & consulting						
Field of technology						
Design & layout						
Functional integration						
Measuring and testing technology						
Modelling and simulation						
Plant construction & automation						
Recycling technologies
