

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

Lightbau Engineering is an independent engineering office in the field of additive engineering that develops application-optimised and individual lightweight construction solutions across all industries. The team supports its customers with a wealth of expertise and provides comprehensive services - from simulation-based development, component optimisation and production-ready CAD design to simulation, consulting and production.

The company has set itself the task of utilising the advantages of additive manufacturing for its customers. Lightbau Engineering combines numerical optimisation tools with the innovative power of nature, exploits the newly gained design freedom and develops innovative and highly efficient lightweight construction solutions for a sustainable form of added value - in the shortest possible time and with outstanding mechanical properties. The digital process chain can always be adapted to the customer's requirements and optimisation goals and enables individual lightweight solutions to be implemented in real time while significantly reducing time-to-market. Coupled with the intelligent performance optimisation of the individual components, this represents an enormous competitive advantage.

Organisation type

Small or medium-sized enterprise

Sectors

No specific sector

Employees

Up to 9

Turnover

Up to €2m

Funding

n/a

Austr. 17
71069 Sindelfingen
Baden-Württemberg
Germany

Lightbau Engineering GmbH & Co. KG

About this organisation

Main areas covered

Additive engineering

Infrastructure

Certifications

Keywords

Additive manufacturing, 3D printing, Bionics, Construction, Simulation

Memberships

Overview of lightweighting expertise

Machine translation

This organisation has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Offer			
Products Parts and components, Tools and moulds, Others (Individual components)		✓	✓
Services & consulting Consulting, Engineering, Prototyping, Simulation		✓	✓

Overview of lightweighting expertise

Machine translation

This organisation has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Field of technology			
Design & layout Lightweight manufacturing, Lightweight design, Hybrid structures, Lightweight construction concepts		✓	✓
Functional integration Actuator technology, Media conductivity, Sensor technology			✓
<i>Measuring and testing technology</i>			
Modelling and simulation Loads & stress, Optimisation, Structural mechanics, Others (Modal analysis)			✓
<i>Plant construction & automation</i>			
<i>Recycling technologies</i>			

Overview of lightweighting expertise

Machine translation

This organisation has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Manufacturing process			
Additive manufacturing 3D printing, Selective laser melting (SLM, LPBF, ...), Selective laser sintering (SLS)			✓
Coating (surface engineering)			
Fibre composite technology			
Forming			
Joining			
Material property alteration			
Primary forming			
Processing and separating Milling			✓
Textile technology			

Overview of lightweighting expertise

Machine translation

This organisation has been machine-translated based on data provided in German.

	Research	Development	Manufacturing & Supply
Material			
<i>Biogenic materials</i>			
<i>Cellular materials (foam materials)</i>			
<i>Composites</i>			
<i>Fibres</i>			
<i>Functional materials</i>			
Metals Aluminium, Steel, Titanium, Others (Stainless steel, Inconel)			✓
Plastics Thermoplastics			✓
<i>Structural ceramics</i>			
<i>(Technical) textiles</i>
