This organisation has been machine-translated based on data provided in German.

Altran is the world's leading provider of engineering and R&D (ER&D) services. The Altran Group offers its customers unique services to meet all challenges in the areas of innovation and transformation. Altran supports its customers in the development of tomorrow's products and services, from conception to industrialisation. Today, Altran has more than 50,000 employees in 30 countries.

Design and simulation of components and systems in all areas of industry and mobility. Use of bionics and artificial intelligence for optimisation and new development. Analysing and improving the life cycle assessment (LCA) of a product or system and material performance. Organisation and implementation of EU and nationally funded collaborative research projects (e.g. SARISTU).
