Fraunhofer Application Centre HOFZET

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

With its HOFZET application centre, the Fraunhofer WKI stands for innovative, application-oriented research and expertise in the field of bio-based composites.

HOFZET's research focuses include the development of application-specific, optimised hybrid fibre-reinforced composites, project planning and implementation of process chains for the manufacture of innovative hybrid FRPs for small and large-scale production, and the development and testing of effective material-specific recycling concepts. HOFZET's modern technical equipment enables the comprehensive production of matrix- and fibre-dominant FRPs as well as the non-destructive and destructive analysis of material properties. Through close co-operation with the Institute for Bioplastics and Biocomposites IfBB at Hanover University of Applied Sciences and Arts, HOFZET offers its customers a broad spectrum of manufacturing processes and testing methods in the field of (bio)plastics technology.

Heisterbergallee 12 30453 Hannover Lower Saxony Germany 🛙 www.wki.fraunhofer.de/de/fachbereiche/hofzet/ profil.html

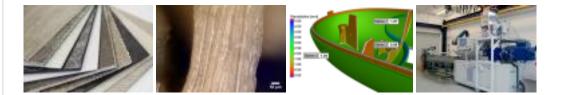

Organisation type Non-university research institution

Employees 50 up to 249

Turnover €10m - €50m

Funding

Fraunhofer Application Centre HOFZET

About this organisation

Main areas covered	Research and development, Fibre composites, Test laboratory, Technical (biobased) textiles, Fibre spraying
Infrastructure	Extrusion, injection moulding, Organic sheet extruder, Mechanical tests, Non- destructive testing, Optical and rheological measurements
Certifications	
Keywords	Hybrid lightweight construction, NFK, Biocomposite material
Memberships	

Overview of lightweighting expertise

Machine translation

	Research	N Development	fanufacturing & Supply
Offer			
Products Parts and components, Semi-finished parts, Materials	~	\checkmark	\checkmark
Services & consulting Consulting, Testing and trials, Prototyping, Validation, Simulation	\checkmark	\checkmark	

Fraunhofer Application Centre HOFZET

Overview of lightweighting expertise

Machine translation

	Research	N Development	fanufacturing & Supply
Field of technology			
Design & layout Lightweight manufacturing, Hybrid structures, Lightweight construction concepts	\checkmark	\checkmark	
Functional integration Sensor technology, Material functionalisation	\checkmark	\checkmark	
Measuring and testing technology Component and part analysis, Visual analysis (e.g. microscopy, metallography), System analysis, Environmental simulation, Materials analysis, Destructive analysis, Non-destructive analysis	~	~	
Modelling and simulation Life-cycle analysis, Optimisation, Processes, Materials	\checkmark	\checkmark	
Plant construction & automation			
Recycling technologies Downcycling, Material separation, Recycling	\checkmark	\checkmark	

Fraunhofer Application Centre HOFZET

Overview of lightweighting expertise

Machine translation

	Research	N Development	/lanufacturing & Supply
Manufacturing process			
Additive manufacturing 3D printing	\checkmark	\checkmark	
Coating (surface engineering) Others (Wet chemical treatment)	\checkmark	\checkmark	
Fibre composite technology Fibre spraying, Manual lamination, Resin infusion process, Vacuum infusion	\checkmark	\checkmark	
Forming			
Joining			
Material property alteration			
Primary forming Extrusion, Casting, Injection moulding	\checkmark	\checkmark	\checkmark
Processing and separating Milling, Sawing	\checkmark	\checkmark	
Textile technology Fibre manufacturing, Preforming, Weaving	\checkmark	\checkmark	\checkmark
