

DYNAmore Company for FEM Engineering Services mbH

DYNAmore GmbH

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

DYNAmore offers a product portfolio that includes the finite element software LS-DYNA, the pre- and post-processor LS-PrePost, the optimisation software LS-OPT and numerous FE models for crash simulation. The company has many years of experience in model development and simulation. A particular focus is the new Material Competence Centre, which focuses on the rapid parameter identification of material models.

Simulation enables the optimisation of structural components (topology and material) and increases the potential for lightweight construction.

Organisation type

Small or medium-sized enterprise

Sectors

Employees

50 up to 249

Turnover

n/a

Funding

Main areas covered Software development, Finite elements, consulting, Engineering services, Structural optimisation, lightweight construction

Infrastructure Mechanical laboratory, Software for structural optimisation

Certifications

Keywords

Memberships
