## Matplus GmbH

### About this organisation

Matplus GmbH is a specialist for material data systems and related services. We support the development and optimisation of innovative metallic structural materials for lightweight construction in industrial practice. We offer software for the calculation of material data and material databases - from mechanical engineering to aerospace.

Our software solutions support the development and optimisation of innovative materials and efficient processing procedures. The focus is on metallic structural materials, e.g. steels, aluminium and nickel alloys. The multivariate optimisation of alloys and process sequences possible with our tools leads to new solutions, e.g. in the use of ultra-high-strength steels for lightweight construction. Cooperation with efficient laboratories and manufacturing partners covers the entire technological chain from melting to processing, metallography, materials testing and trials. In doing so, we are fast, targeted and, above all, practice-oriented.

Hofaue 55 42103 Wuppertal North Rhine-Westphalia Germany

☑ www.matplus.eu

Main areas covered	Materials Simulation, Materials Databases, Materials Development, Alloy Design, Optimisation of Heat Treatments
Infrastructure
