This organisation has been machine-translated based on data provided in German.

At our company headquarters in Ludwigsfelde, we build your vehicles according to your individual requirements and deliver them to you ready for use. We also manufacture complete systems for the protection of freight and vehicles as kit solutions. All Apprich Secur GmbH products are characterised by a high degree of innovation. To achieve this, we rely both on the integration of third-party systems and on the continuous development of our own technologies.

Our company headquarters in Ludwigsfelde is characterised by a high level of vertical integration. We offer the following services: - Laser cutting of aluminium, steel and armoured steel in various thicknesses - Bending of components with our hydraulic press brake - Production of fibre composite components (GFK / CFK) - Project planning for prototype and sample construction The areas of application are diverse: - Automotive - Core and mould construction - motorsport - boat building - Prototype construction and small series production
