

weißensee academy of art berlin

Textile and surface design

About this organisation

Machine translation

This organisation has been machine-translated based on data provided in German.

Art, design and society have a synergetic relationship with each other. In order to promote this cross-border thinking through education, a number of profile-forming features characterise the art academy: the unity between teaching and production, the one-year interdisciplinary foundation course, the subject-specific programmes and the accompanying scientific-theoretical courses.

New courses on topics such as technology development, sustainability and materials research are dedicated to current social issues; post-study support programmes round off the qualification.
